Experience

Amazon March 2025 - Present
Software Dev Engineer Chennai

Java | Python | TypeScript - AWS | Lambda | CloudWatch | MLFlow | CloudFormation

- **Amazon Payments:** Developed an **accounting automation framework** for **CoBrand Credit Cards in Brazil**, streamlining **Invoice generation and Revenue collection** for a total revenue value of over **50M+ BRL**.
- **AGI for Alexa:** Designed and implemented an **MLFlow-integrated platform** enabling scientists to run over **160+** experiments and publish metrics **asynchronously** to leadership dashboards for analysis.
- **Alexa Personalization:** Managed a **Tier-1** system processing **100K+ requests per hour** across **4 regions**; resolved scaling issues within **5 minutes**. Worked on **Finite State Transducers** for efficient Alexa Action routing.

Morgan Stanley Aug 2023 - Mar 2025
Technology Associate Bengaluru

TypeScript | Angular | NgRx - Java | Spring Boot | Gradle - Kafka

- **Led** Client Onboarding's **MonoRepo**, partnering with **20+ teams** using **Agile** & **TDD**; Designed a **risk-reduction solution** that boasted **HK-SG credit apps by 10%**.
- **Tech Analyst:** Modernized monolithic apps to a **scalable architecture** using **TDD**, improving **system availability from 75% to 95%**.

Internships

Global Groupware Solutions Ltd. (EmployWise) Sep 2022 - Jun 2023
Backend Developer Intern Remote

Java | Spring Boot | Maven - Kafka - Neo4j | Couchbase - AWS

- Worked on an **HR Management Product**, planned and developed various **Microservices** using an **Event Driven Architecture** and **IFTTT**.
- Used **Neo4j**, a **graph database**, to manage **100K+** hierarchical user relationships.

Morgan Stanley May 2022 - Jul 2022
Technology Analyst Intern Bengaluru

Java | Spring Boot | Gradle - Apache Kafka

- Worked on **core Fixed Income Trading systems** delivering **real-time currency rates** impacting **20%+** of **FID's profits**. Reduced **batch latency** from **15 mins** to **1 min**.
- Implemented **multi-threading**, **batch processing**, and **event management** frameworks.

Education

National Institute of Technology Jul 2019 - May 2023
Instrumentation and Control Engineering B. Tech
7.8

Technical Skills	Programming Languages	
	Java Kotlin Python JavaScript TypeScript C# C++ Rust	
	Platforms, Stacks, Engines, Tools	
	Android AWS React Django Spring Boot MySQL MongoDB Unity Blender ML using Scikit-Learn PostgreSQL Diesel Phaser Hadoop Apache Kafka Gradle Couchbase Neo4j AWS Angular Maven	
	Other Software and Technologies	
	Office 365 Photoshop Git HTML CSS Tina Arduino MATLAB	
	Operating Systems	
	Linux Windows	
	Special Skills	
	Software Architecture Product Design Debugging Testing Leadership Problem Solving Teamwork Creative	
Projects	Attack on Robots	Q4 2021 - Q1 2022
	Lead Full Stack Developer	
	React-Redux Phaser JavaScript - Diesel Rust - PostgreSQL	
	- Lead the development of a City Planning and Defense Simulation Multiplayer Game for Pragyan 22'. Which had created 170+ new user registrations for Pragyan. - The game had an isometric gameplay with modular architecture, multiple game modes, optimized simulators.	
	Beer Factory	Q4 2020 - Q1 2021
	Full Stack Developer	
	React Semantic UI JavaScript - Django Python - MySQL	
	- A Resource Management Game for Pragyan 21', which had over 400 participants. - The major features are Duels (multiplayer matchmaking part connected using sockets), Daily Challenges, in-game ads.	
	Kaval Arann	Q4 2020
	App Developer	
	Android MVVM Kotlin - Spring Boot Java - MongoDB	
	- An Android App developed by Delta Force, NITT, for the Department of Police, Tiruchirappalli. (Patent Pending) - The major features are recording of public requests and filing FIR, integration of existing services, contact information, attendance management based on Location	
Position of Responsibilities	Delta Force (Programming Club NITT)	Jun 2020 - Jun 2022
	Developer	
	- We develop and maintain Apps and Programs for fests and events conducted in NITT like Festember, Pragyan - Coordinate with teams, work on various projects, Ideate and Collaborate on new open-source projects.
